## **DETAILED ACTION**

# Specification

1. The disclosure is objected to because of the following informalities. Errors inconsistent with the drawings appear throughout the specification. For instance, page 14 of the specification, lines 21-22 disclosing a layer 13 in figure 14. However, figure 14 does not have reference 13 to compare with. Similar errors appear throughout the specification. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification. Appropriate correction is required.

#### **Drawings**

2. Likewise, the drawings are objected to for the same reasons described above.

Appropriate correction is required.

## Allowable Subject Matter

3. Claims 1-16 are allowed. The following is a statement of reasons for the indication of allowable subject matter. The present invention relates to micro-electromechanical systems (MEMS) devices and their fabrication, and more particularly to a method of improving via adhesion in MEMS devices having a multi-layered structure. Regarding claims 1, 6, 12 and 16, the prior art fails to disclose that the via seat is patterned in the first layer and the via opening in

a second layer, and depositing material over the second layer such that the material enters the via and fills or coats the via opening and the via seat.

#### Conclusion

4. This application is in condition for allowance except for the formal matters describe above.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
